

Useful Links Class

by Dick Evans

We first took a look at my site at www.rwevans.com and used it as an example to show how to:

- Use Windows+M to minimize all open windows on desktop
- Use Ctrl + to increase the size of a Web page
- Use Ctrl – to decrease the size of a Web page
- Use Ctrl 0 to bring the size back to normal
- Use Ctrl+Enter to automatically at http://www and .com to the word in the address bar to speed up the entry of addresses.
- Use Ctrl+Home to jump to the top of a Web page
- Use Ctrl+End to jump to the bottom of a Web page
- Locate a link by mousing over items on the screen looking for the mouse pointer to change into a hand. The presence or absence of an underline does not mean link or no link.
- Use Copy/Paste to send a URL to someone else

And we spend time on the following links by trying them out and discussing what they are used for and how to use them.

Reverse Phone Numbers	http://www.whitepages.com
Who are your neighbors	http://neighbors.whitepages.com
Charlotte County Florida Tax Information	http://ccappraiser.com/
Home Values	http://www.zillow.com/
Shorten that URL	http://tinyurl.com/
Email that Picture	http://tinypic.com/
You Tube Videos	http://www.youtube.com/
Convert YouTube to MP3 and download	http://www.vidtomp3.com/
Office apps	http://docs.google.com
Encyclopedia	http://www.wikipedia.org/
Things to do list	http://tadalist.com/
Auction	http://www.ebay.com/
Generate Word Clouds	http://www.wordle.net/
Internet Radio	http://www.pandora.com/
TV on the Web	http://www.hulu.com/
Software Installer	http://ninite.com/
Backup in the Cloud--use code GFBU22	http://www.mozy.com/
